Our World Class Manufacturing Facilities

Amara Raja, known for its legacy in technology, has been a key global player in the power management industry for several years. A pioneer of VRLA batteries in India, Amara Raja has the distinction of making batteries that lasts long in harsh tropical conditions.

Catering to the ever-changing power delivery and customer needs, Amara Raja has batteries for automobiles, data centers, UPS, telecom, solar, power distribution sub-stations as well as the home environment. With installations in more than 40 countries, Amara Raja has cast a lasting impression with its fool proof technology and performance.

The Amaron Quanta HUPS SMF battery designed for energizing homes, delivers steady power for long duration. With quick recharge capability this maintenance free battery charges faster when there is electricity and supplies power in the event of a power cut. It also excels in various other ways:

- High energy efficiency
- Superior performance in PSOC conditions
- Long service life
- Deep cycling
- Leak proof, no acid fumes or gases
- User friendly & maintenance free
